It Works!
PROBIOTIC™

targeted digestive
and immune health†

etary supplement | 30 vegetarian capsules

LOVE ALL YOUR GUTS NOT JUST HALF!

- 10 BILLION LIVE CULTURES
- TARGETS BOTH SMALL
AND LARGE INTESTINES†

WHY DO I NEED A PROBIOTIC?

Every day you breathe, drink, and eat bad bacteria that diminish your body's good bacteria, throwing your microflora (tummy health) off balance. When you have more bad than good bacteria in your microflora, it can affect your immune system and your health!

Good bacteria called probiotics help fight off the bad bacteria and restore your microflora balance.

HOW DOES IT WORK?

PROBIOTIC PROPRIETARY BLEND

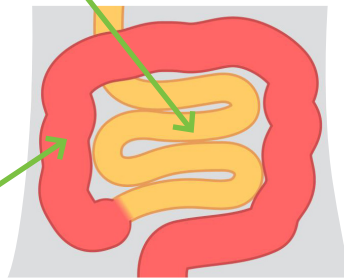

Five unique probiotic strains pack the punch of 10 billion live cultures, restoring the good bacteria throughout your whole digestive tract.†

3 STRAINS OF LACTOBACILLUS

- Work together in your small intestine
- Metabolizes carbohydrates to produce lactic acid, helping lower pH levels in the digestive tract†
- Prevent bad bacteria from flourishing, balancing it out with good†

2 STRAINS OF BIFIDOBACTERIUM

- Target and support your body's immune response†
- "Synbiotic" relationship with prebiotics so they work better together through your large intestine

HOW DOES IT HELP ME?

RESTORED MICROFLORA

The good bacteria found in your microflora is restored to better fend off immunity-challenging bacteria, supporting your body's immunity and strengthening your digestive health.†

HEALTHIER DIGESTIVE SYSTEM

Your system stays regular, you're better able to absorb nutrients from the food you eat, and pH levels in your system are lowered.†

BALANCED IMMUNITY

Balanced microflora results in supported, balanced immunity—70% of which is in your digestive tract.†

HOW DO I USE IT?

Take one capsule every day, preferably with food.

PREBIOTIC PROPRIETARY BLEND

"Green" prebiotic fiber of spinach, kale, watercress, and Orafiti® inulin fiber fuels the five probiotic strains. This "Green" prebiotic fiber also targets your large intestine, feeding the Bifidobacterium probiotic to restore the good bacteria.†
